Details *

Name EBS4 Programme Details

JSON Data Source *

Source Asset [Get EBS4 REST Programme Details \(Id: #134089\)](#)
 Select a REST Resource asset and the contents of the JSON data will be retrieved using that asset. You can also specify a text file asset or another page.

or URI to JSON data If no source asset is specified above, the JSON data will be retrieved from this local path or URI. Global keywords are supported. Note that it is recommended to specify a REST Resource above as the source if fetching data from a remote source.

Advanced

JSON Data Attributes ProgrammesByProgrammeArea[0].FES_UNIT_INSTANCE_CODE,ProgrammesByProgrammeArea[0].UNITS_LENGTH,ProgrammesByProgrammeArea[0].FES_LONG_DESCRIPTION,ProgrammesByProgrammeArea[0].DURATION,ProgrammesE
 A newline or comma separated list of JSON values to retrieve as attributes in addition to the top-level properties. This can be used to access data which is deep within your JSON structure. Format is JS notation (eg.: "objectName.foo.bar", "obje

JSON Root Object If your JSON data array is not in the top-level of the JSON structure, enter the path to the property which holds a JSON array and parsing will begin from there. Format is JS notation (eg.: "response.results" or "requests.response[0].data"). Global

Record Set Asset Names *

Record Set Asset Names Optionally customise the name of the feed's shadow assets. It can either be a normal string or a combination of string and keywords. See the Available Keywords section below for the keywords available for use in this field.
